

How to connect Lockhart-Phillips 3 dual filament turn signals

LP-3 Dual Filament Turn Signal

Connect blue wire to solid black LP wire

Cut and remove original wires and signal lights. Tape off wire ends.

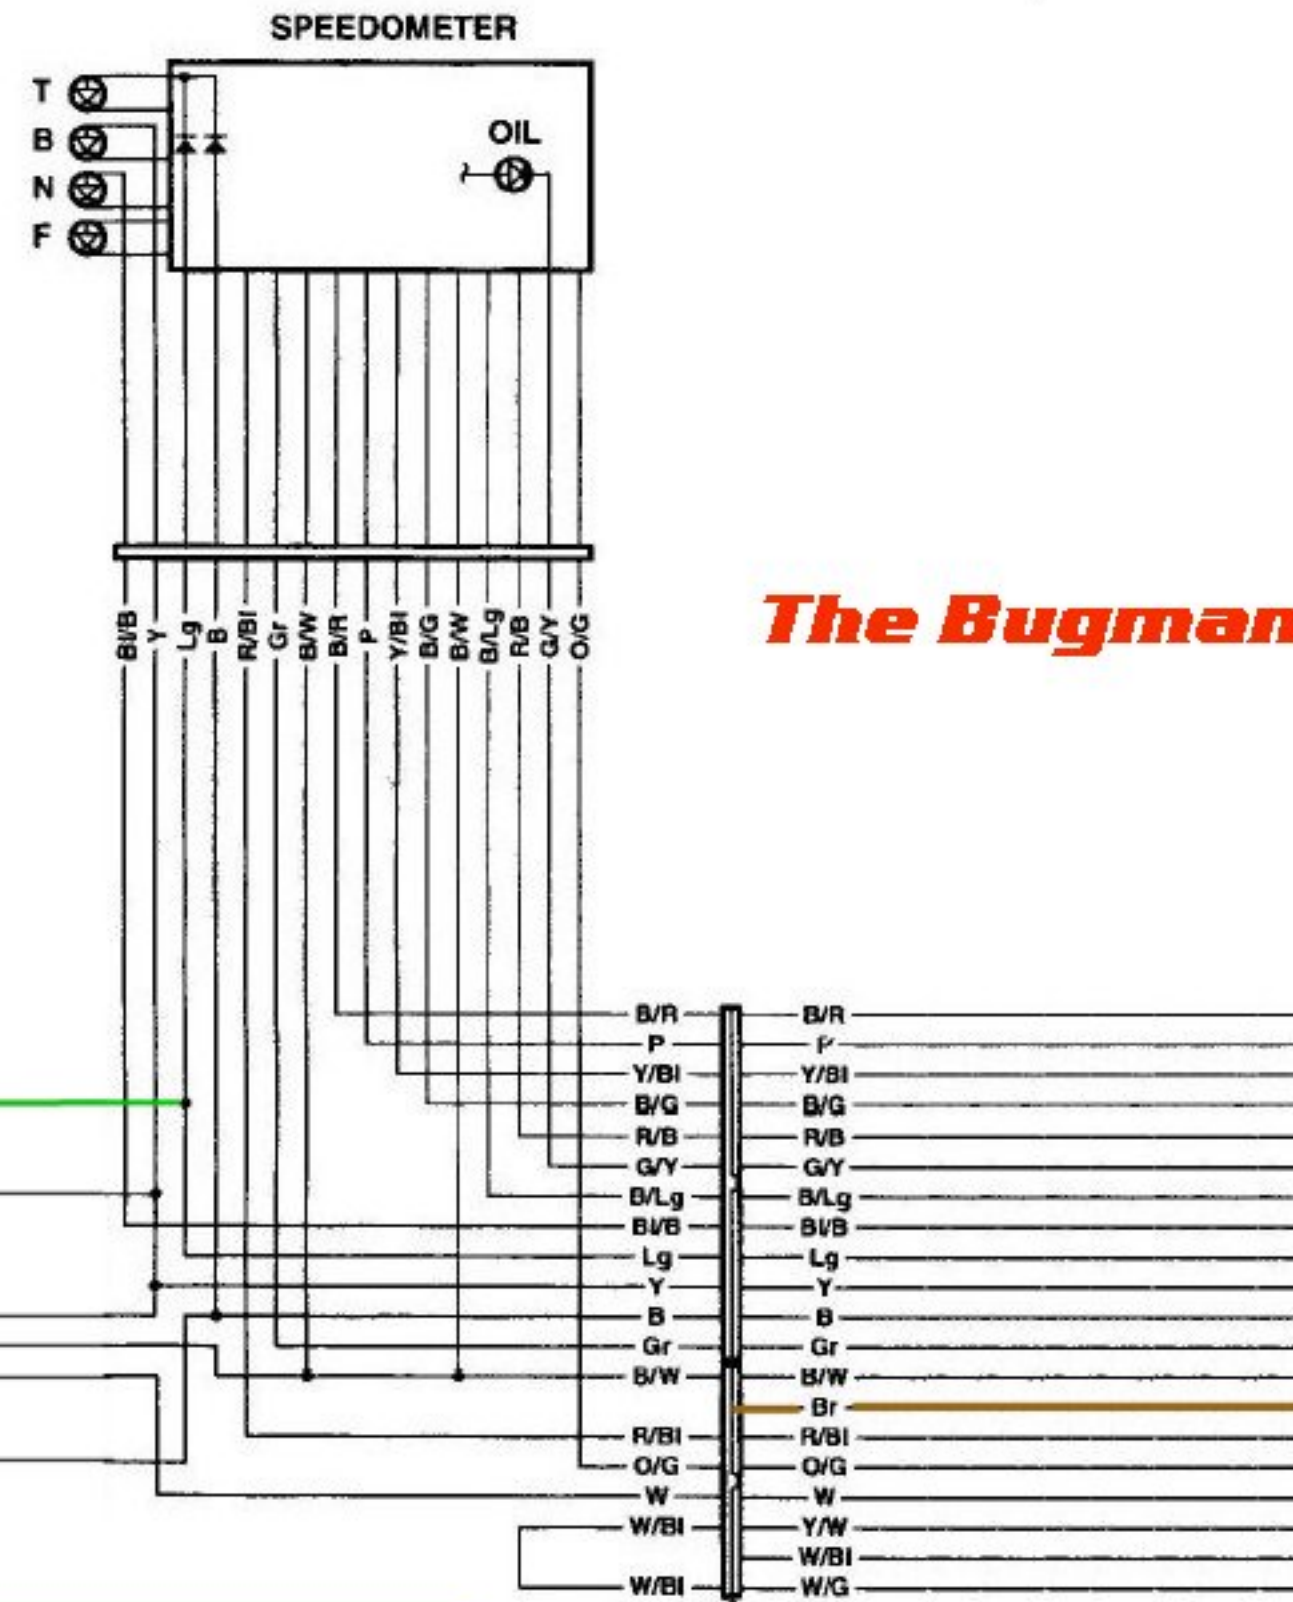

Connect blue wire to solid black LP wire

LP-3 Dual Filament Turn Signal

ST-501 Scotchlock side tap splice

The Bugman

Blue connecting wire

SOLID BROWN WIRE

ST-501 Scotchlock side tap splice

Connections:	
LP wires	Suzuki Wires
Red (turn signal hot)	Light green on right Solid black on left
Solid black (running light hot)	Brown (I used a blue connecting wire from brown to the LP black)
B/W (Ground)	B/W

Large Grey Plastic Connector
(Found on right side of bike, beneath right fairing)
